

HYDR<sup>TRAIL</sup><sup>TM</sup>  
Termite Protection Adjuvant System

# ***YOUR NEW LINE OF DEFENSE***

Treat the **PERIMETER** *Not Just the Station*

**Termite Guiding Technology**  
Intercepts the wood-seeking termites  
and directs them into termite stations

Science From  
**inzecto**

# 3 SIMPLE STEPS:

Treat the Perimeter >> Connect the Stations >> Create a Detection Zone

**FOR 2X FASTER DETECTION + LESS DAMAGE**

Science From  
**inzecto**

# HYDR<sup>o</sup>TRAIL<sup>TM</sup> TESTIMONIALS

"After conducting field trials and reviewing laboratory research, I saw a lot of potential for HydroTrail to improve bait performance and to protect structures. The HydroTrail Detect and Direct System can be a game changer for termite treatments."

**Paul Hardy, retired**  
**Director of Technical Services, Orkin Exterminating**

"We investigated HydroTrail and termite monitors in our University of Florida Urban Entomology Laboratory and in the field. HydroTrail effectively links the space between monitor stations so termites trail to stations rather than possibly foraging between stations to damage the structure."

**Phil Koehler, PhD Professor Emeritus**  
**University of Florida, Department of Entomology**

"When my laboratory discovered a chemical that termites would follow, I knew we had a way to manage their behavior; a way to direct them away from the home and toward their demise."

**Dr. Gregg Henderson, PhD LSU Urban Entomologist, Emeritus**

"As an early user of HydroTrail, I've been able to share with other pest professionals how HydroTrail helped termites find installed monitoring stations that hadn't had any previous activity. I'm excited to see this emerging technology improve termite detection and grow revenue."

**Dr. Claude Thomas, PhD Entomology, Lindsey**  
**Pest Services, Jacksonville, Florida**

# HYDR<sup>TRAIL</sup><sub>TM</sub>

Termite Protection Adjuvant System

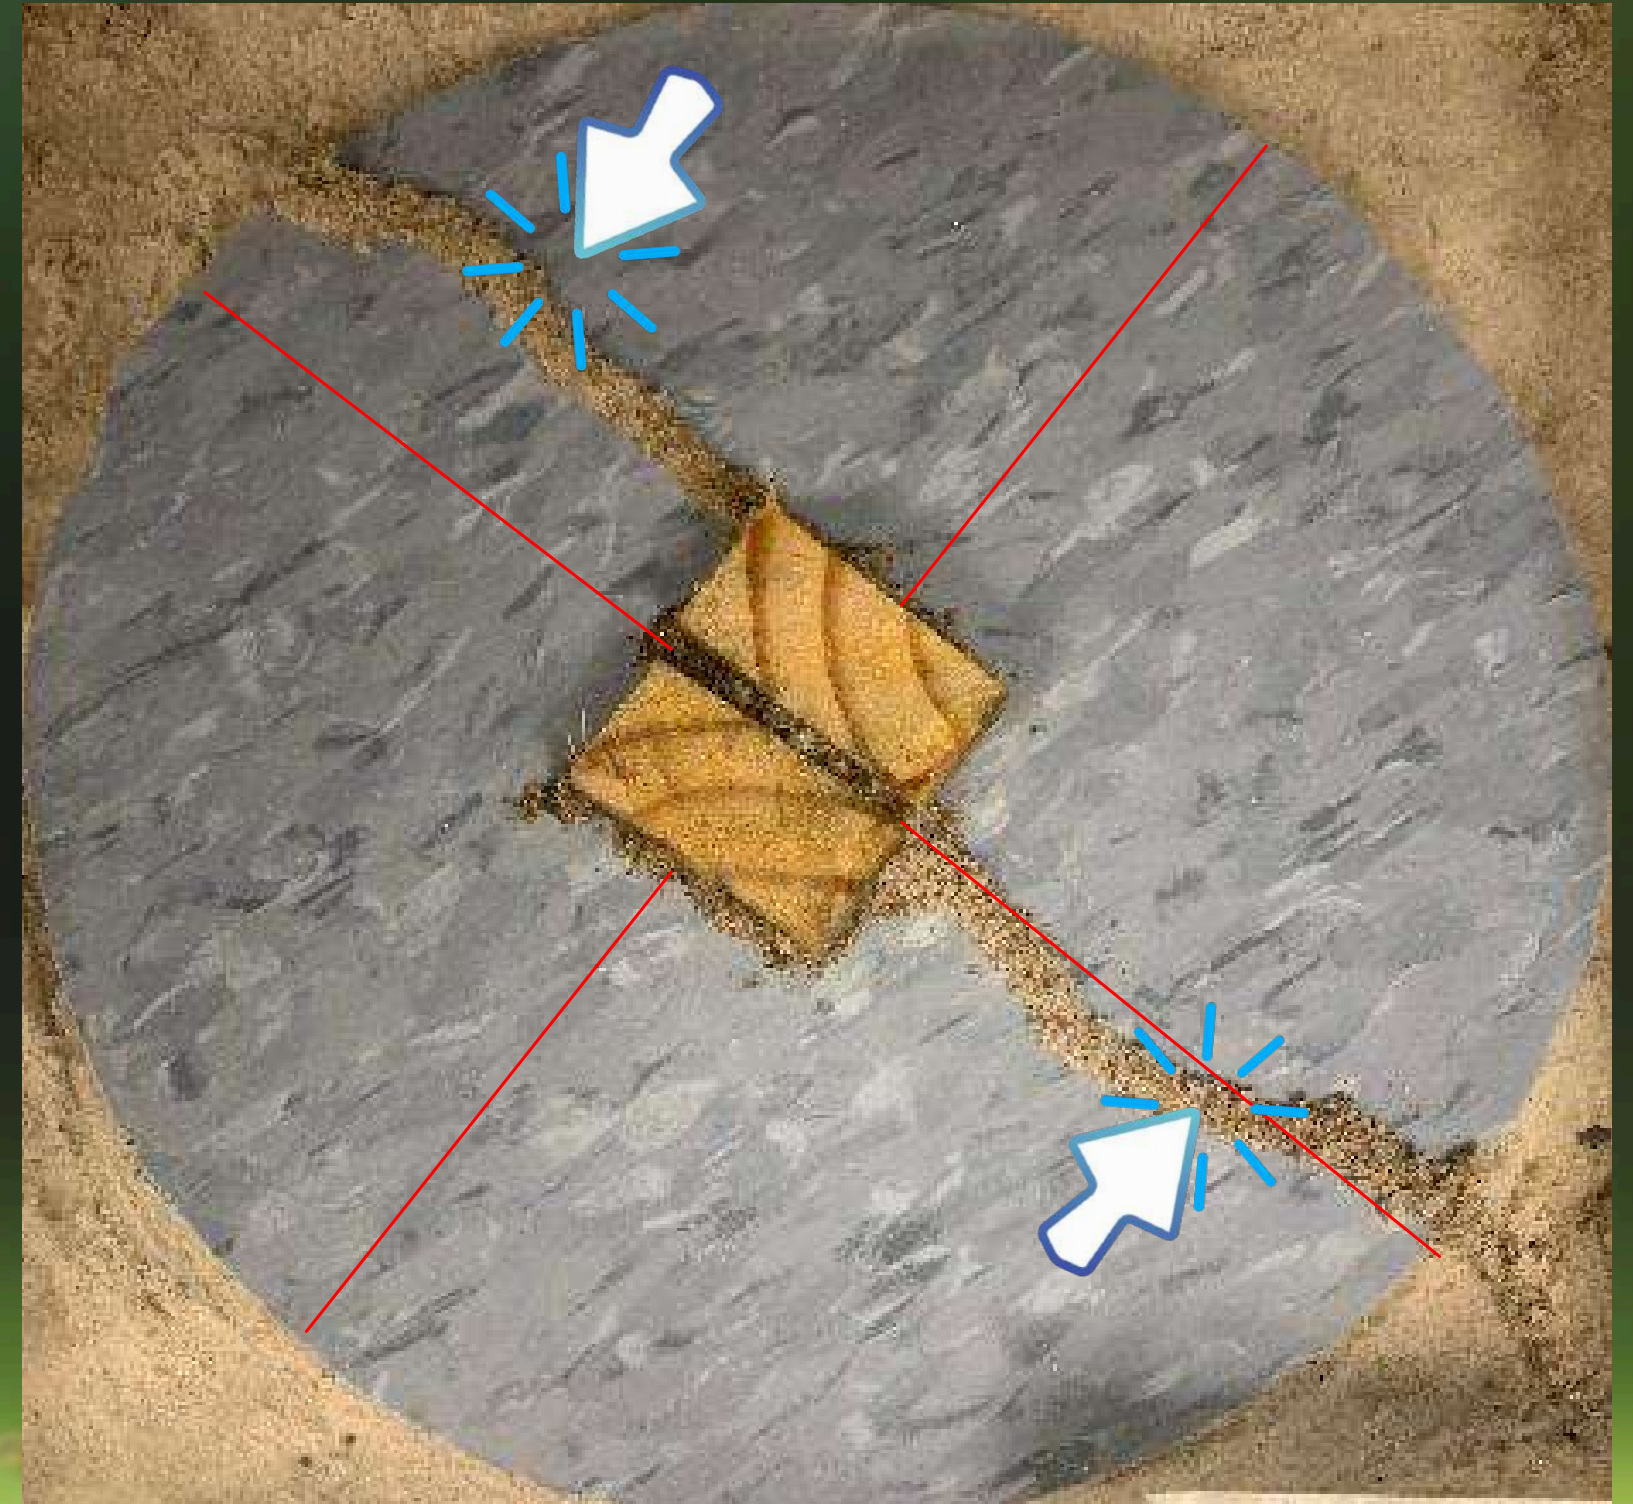

- Proven efficacy for Subterranean termites, Eastern sub termites, and Formosan termites
- 90-day persistence in soil
- **Biodegradable**
- No digging required
- Easy to use

Science From  
**inze**cto

92.5% of Termites  
followed the  
*HydroTrail*

Science From  
**inze**cto

# HYDRATRAIL™

Termite Protection Adjuvant System

- Termite Guiding Technology
- Intercepts the wood-seeking termites and directs them into termite stations
- **“Connect the Stations”** for better detection
- 2 Times Faster Detection
- **Aggregates water in limited areas, forming a Hydrotrail that effectively directs foraging and wood-seeking termites**
- Proven efficacy for Eastern Subterranean and Formosan termites

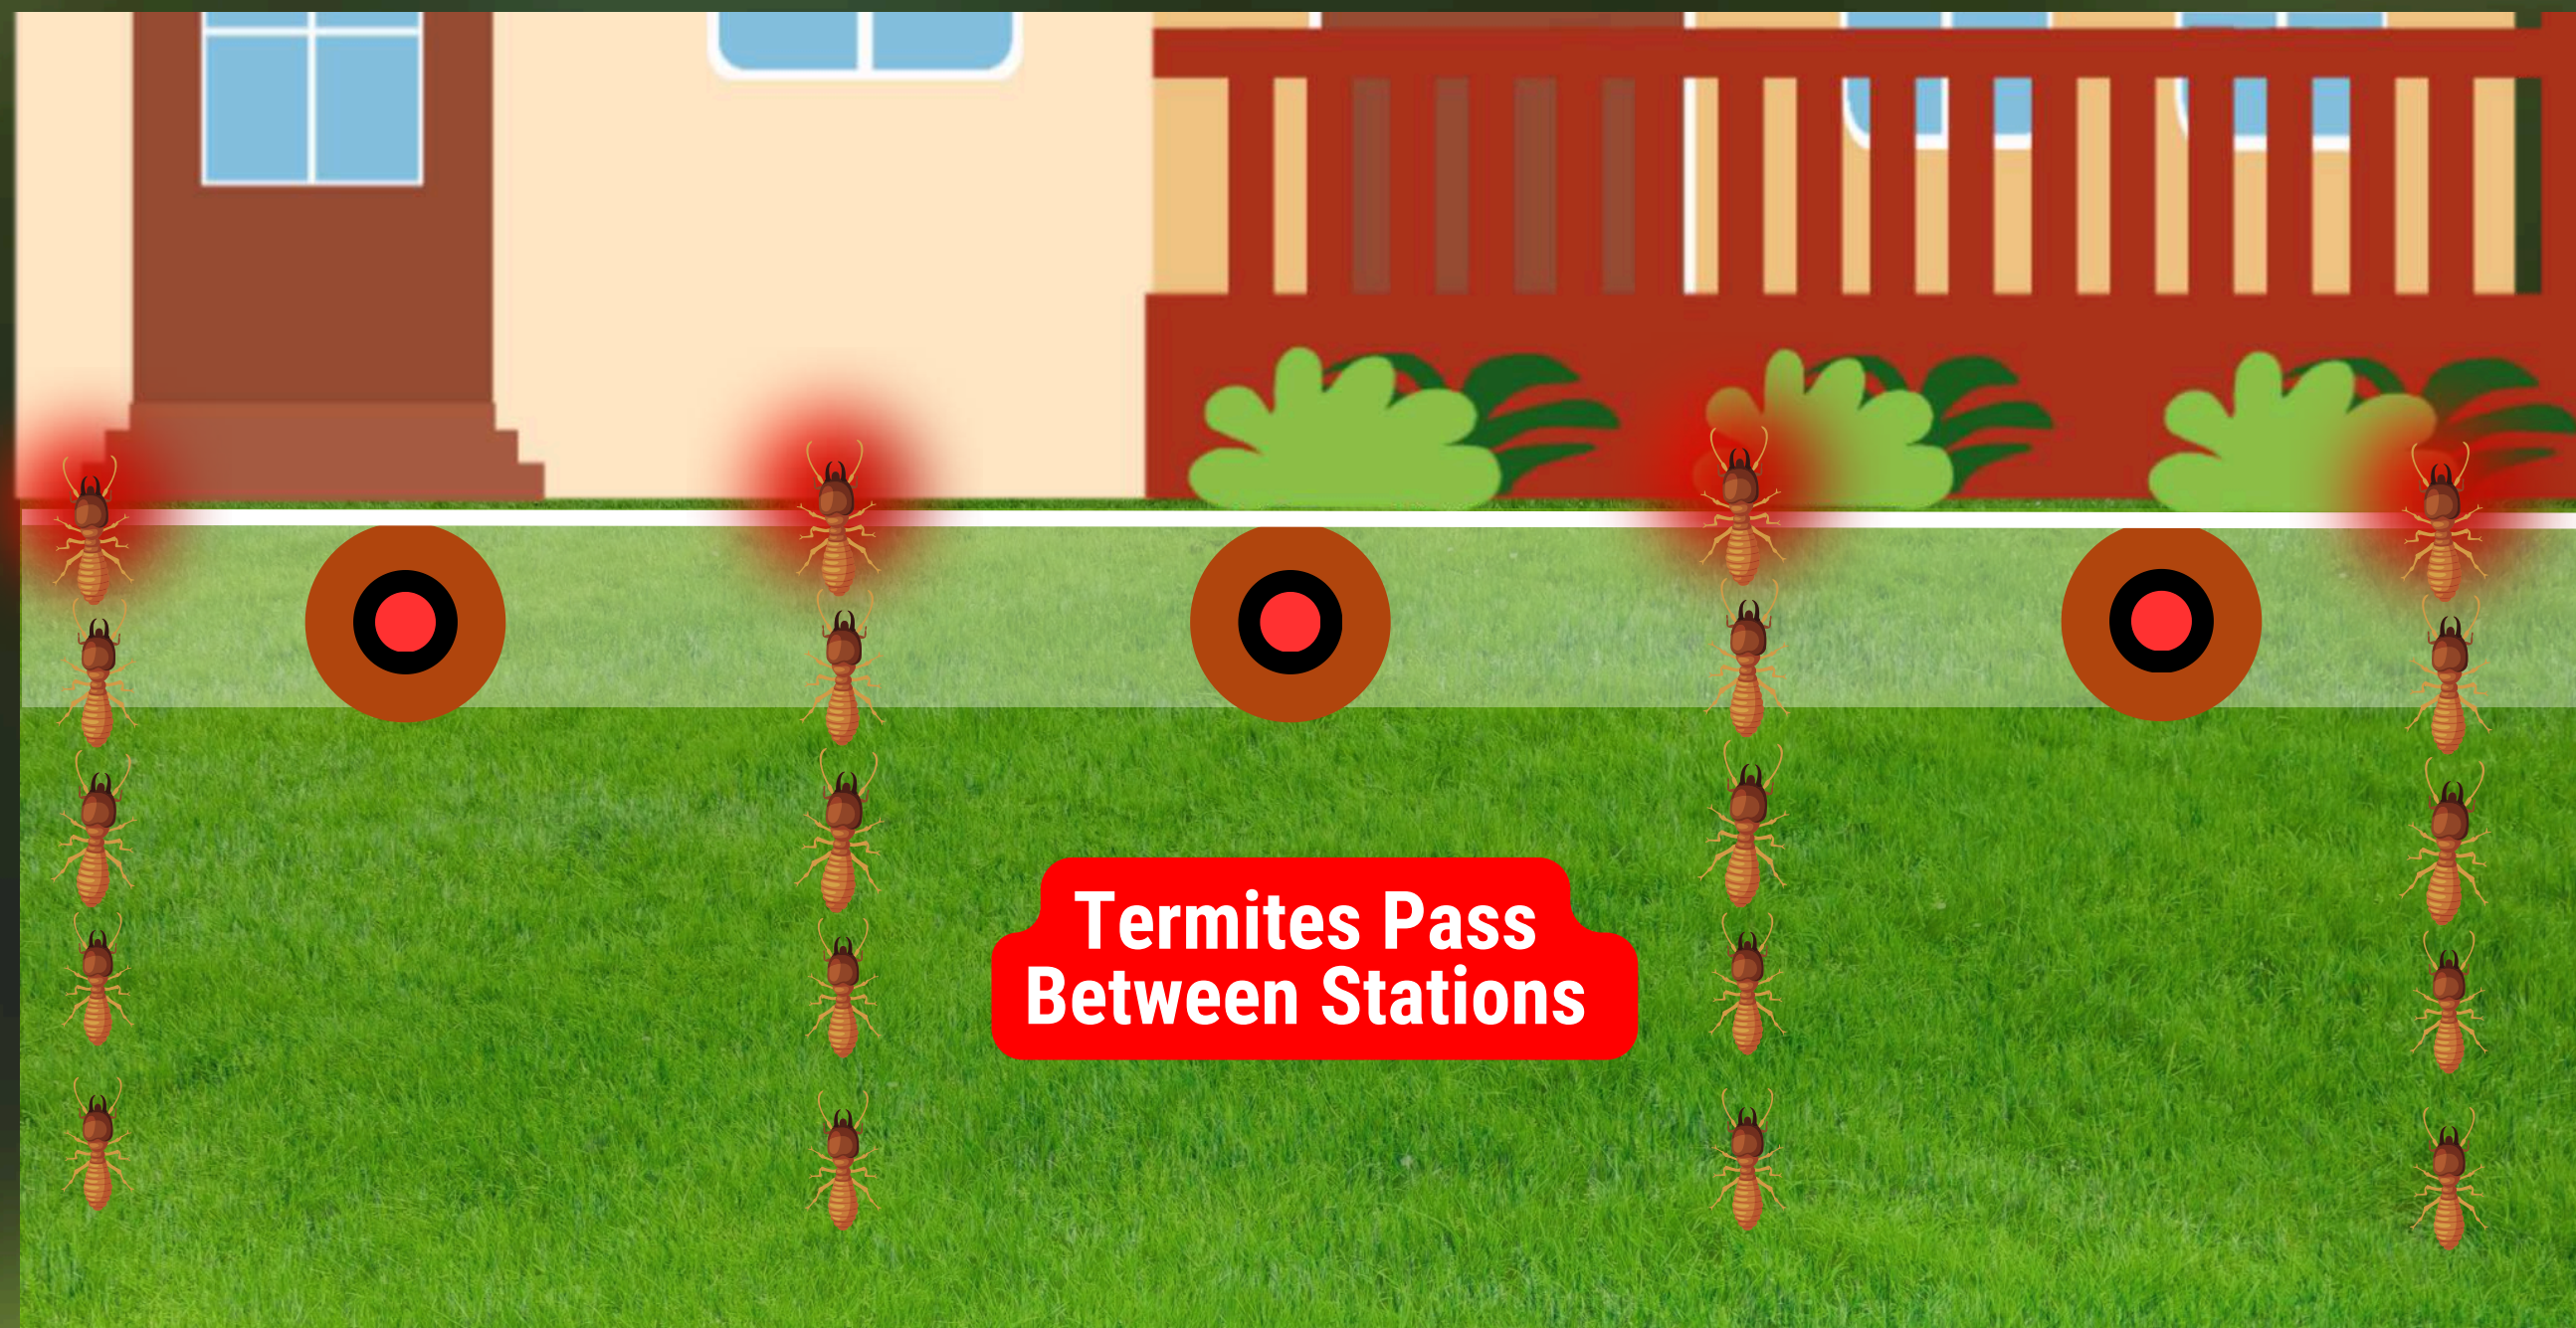

Science From  
**inzecto**

# Without HydroTrail

Termites can pass  
between stations

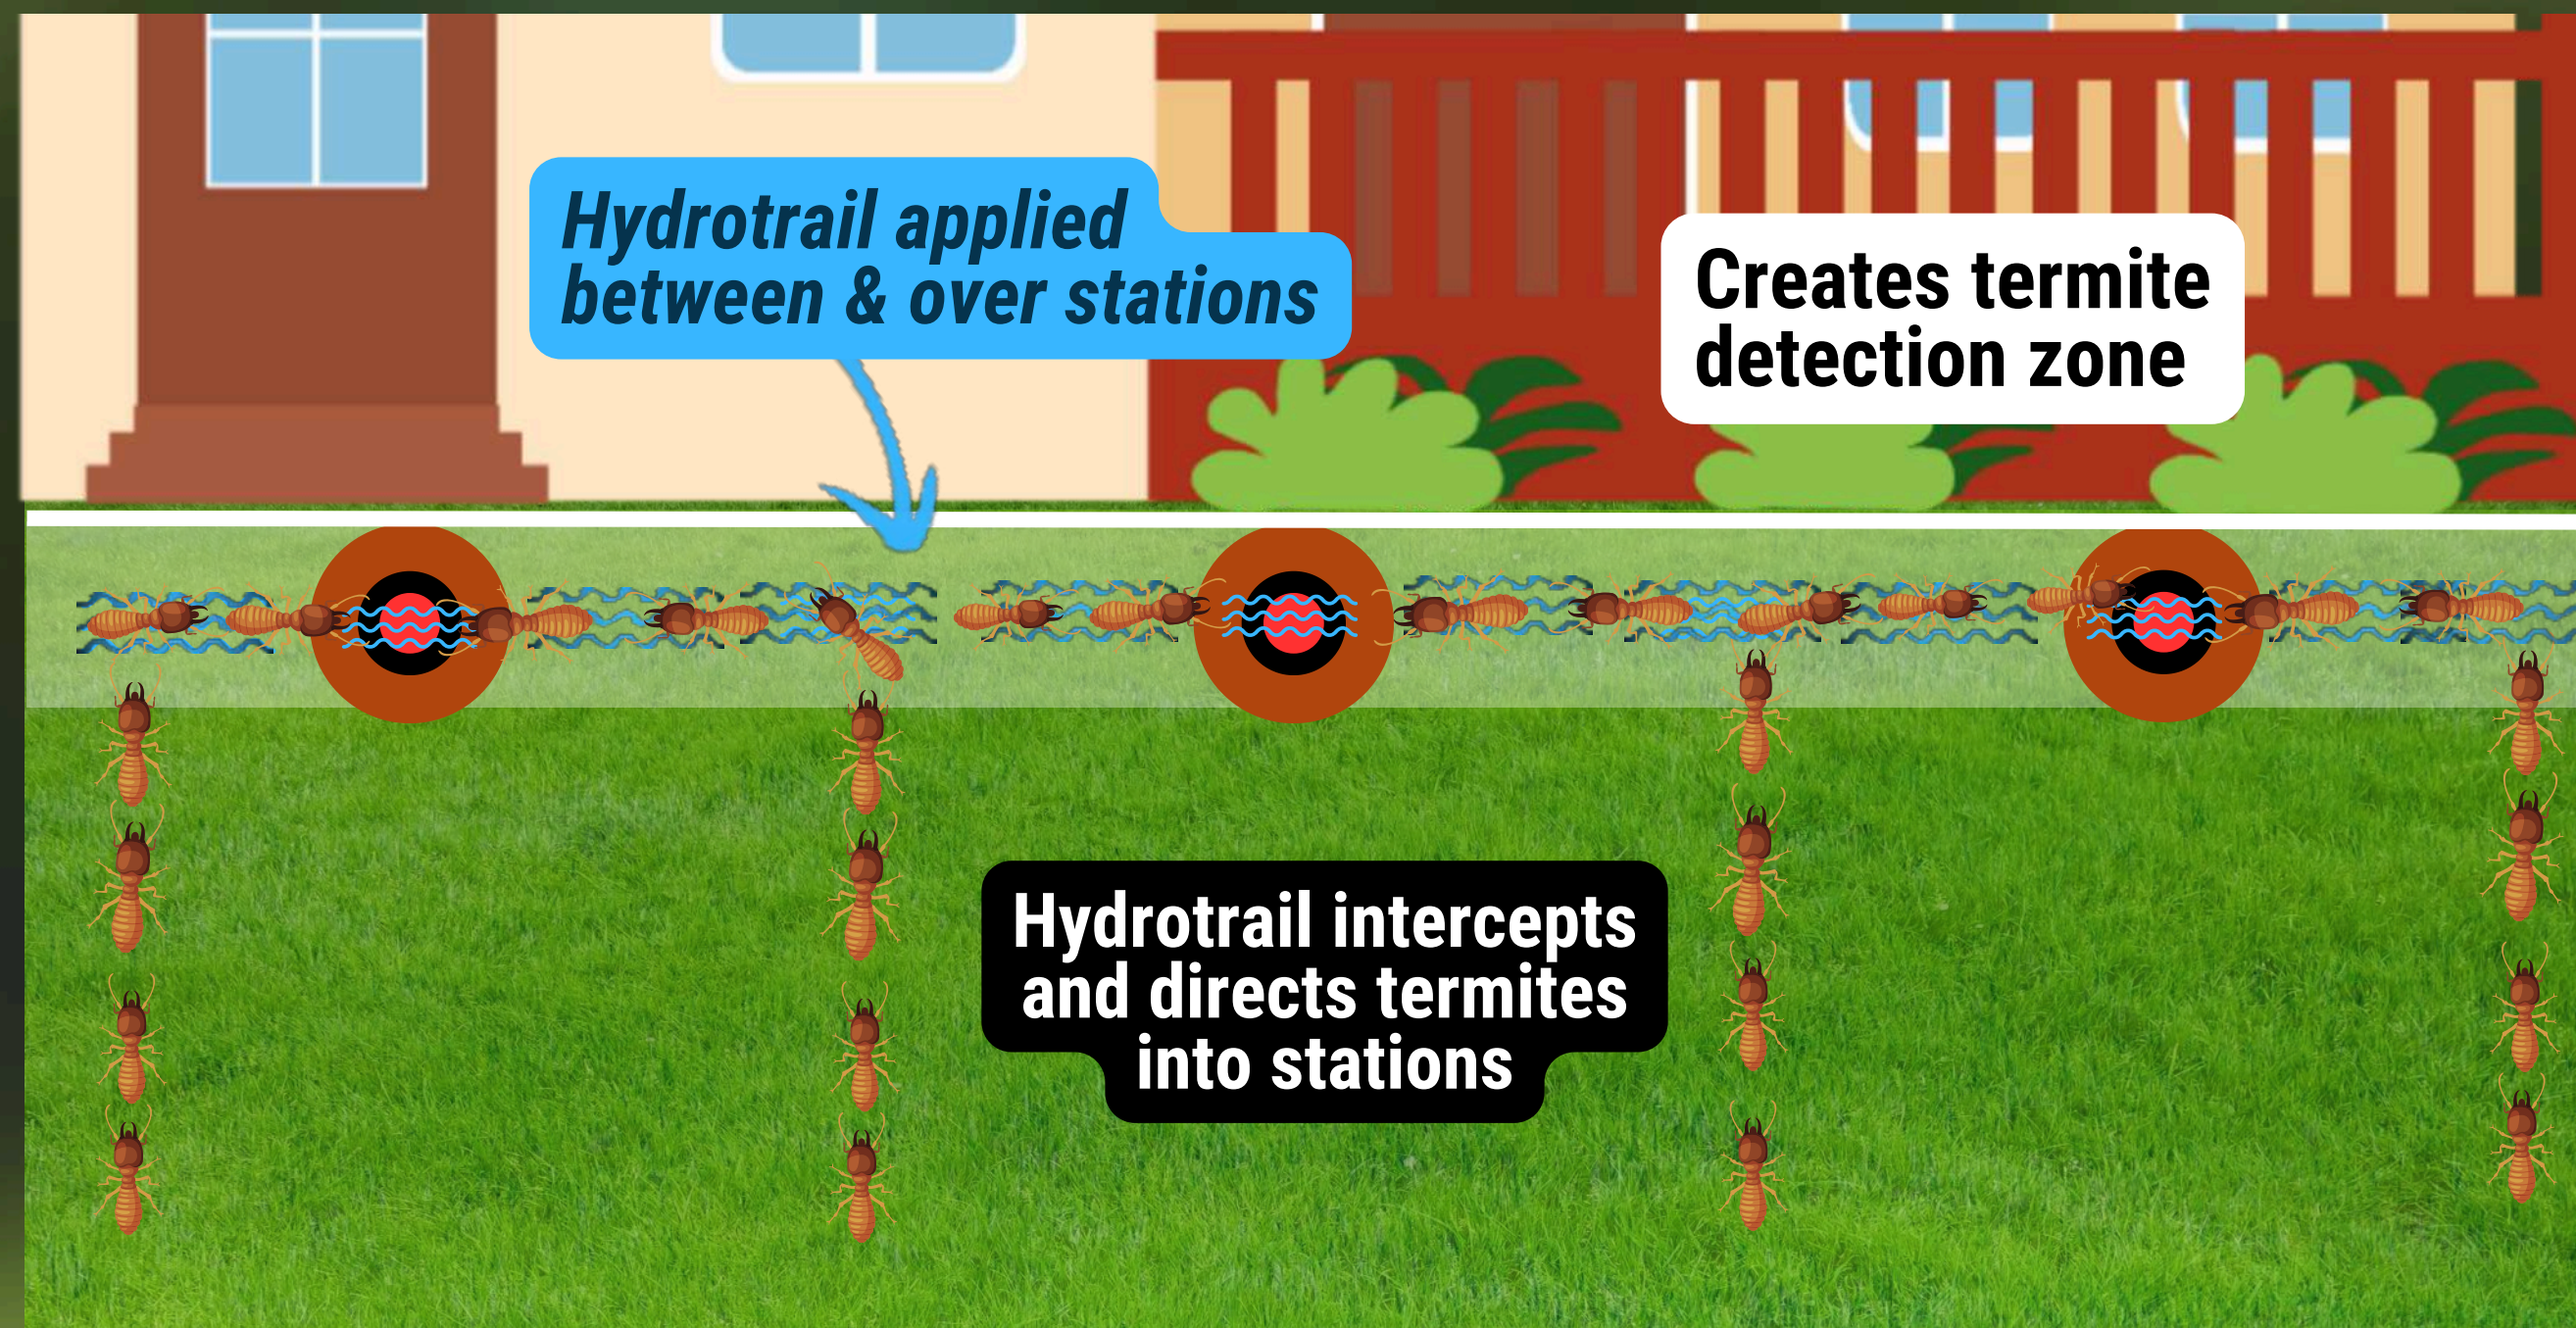

Science From  
**inzecto**

# With HydroTrail

92.5% of Termites  
Intercepted

Science From  
**inze**cto

# HYDR<sup>®</sup>TRAIL<sup>™</sup>

Termite Protection Adjuvant System

"CONNECT THE STATIONS,"  
CREATING A  
**DETECTION ZONE** AROUND  
THE PROTECTED AREA.

Science From  
**inze**cto

# How to apply?

To mix 0.145 % desired spray solution dilute 0.19 fl. oz. of Termite Hydrotrail in 1.0 gallon of water. One 16.9 fl. oz. bottle can treat 344 linear feet.

- Apply at a rate of at least **10 gallons of spray solution per 38 linear feet** to achieve soil penetration. Treat for a “Connect the Station” application.

**Repeat the application every 3 months.**

**One (1) Bottle Can Treat About Two (2) Typical Single Family Homes**
