

inzecto

Next-generation pest control solutions,
built on **insect biology**.

Developed at the University of Florida,
#1 Entomology Department in the world.

Research funded by the **US Pentagon**.

 EPA Registered

 No PPE Required

 3 Months Continuous
Mosquito Control

 100% Recyclable

INZECTO.COM

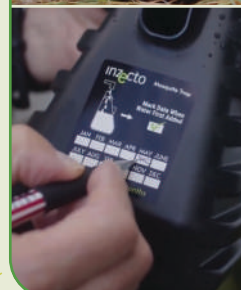

JUST ADD WATER

Routinely check the water presence
and just refill if it's empty.

EASY TO PLACE

Can be placed in a shaded
area or **hung from a tree**.

MARK THE CALENDAR

when water is first
added, **recycle and
replace in 3 months**.

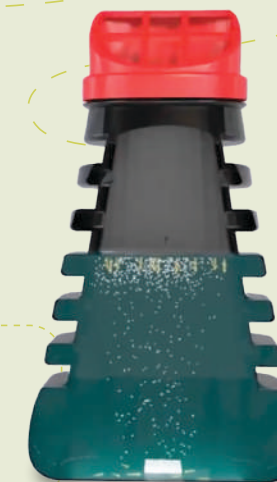

HOW IT WORKS

Prevents Adult Emergence of **Aedes Mosquitoes**, the most common urban mosquitoes, including those that may transmit Zika, Dengue or Chikungunya virus, by **killing them in the larval stage**.

Inzecto attracts mosquitoes to the traps instead of treating the whole yard with pesticides.

Everything about the trap is proven to attract mosquitoes, from the trap design to a sachet with a leaf infusion that makes the water optimal for egg-laying mosquitoes.

The inner sides of the trap are coated with a microporous polymer embedded with microdoses of adulticide and larvicide. Slow release of the insecticides grants extra safety to humans, animals, and pollinators while killing mosquitoes and disrupting their life cycles.

INZECTO MOSQUITO TRAP

inzecto

3 MONTHS OF MOSQUITO CONTROL

Attracts & kills urban
mosquitoes with a
one-step process that
disrupts their lifecycle.

EPA REGISTERED LABEL • 2026

ENTOMOLOGY & EFFICACY

► SUPERIOR ATTRACTIVENESS

Proprietary design and ingredients, attracts more than other containers usually found in yard.

► KILLS MOSQUITOES

 and interrupts their life cycle

► EPA- REGISTERED 3 MONTHS OF CONTROL

That means only 4 deployments needed for year-round prevention and control.

► USE NEAR SENSITIVE AREAS

Usable near water, plants, fruit trees, schools, day-cares, sports centers, hospitals, and more; places where other methods can't be used.

► COVERS 3,000-4,000 SQFT

ENVIRONMENTAL

► 100% RECYCLABLE

Made with up to 50% recycled plastic.

► PROTECTS POLLINATORS

Targets only container-breeding mosquitoes. Not harmful to bees, butterflies, ladybugs.

► GREENPRO-COMPATIBLE

► FEWER SERVICE TRIPS

 mean lower CO2 emissions.

► SAFE TO PLACE

 around people and animals

► NO INSECTICIDE RESISTANCE

Does not select for insecticide resistance

OPERATIONAL EFFICIENCY

► NO PPE REQUIRED

No PPE required for handling or placement (unique among professional-grade products), meaning better comfort in hot weather and lower legal/compliance risk.

► EFFICIENT, EFFECTIVE

Fewer call-backs, fastest service on the market, boosts daily service calls.

► SIMPLE TO INSTALL

Just add water and place in a shaded area or hang from a tree.

► QUARTERLY DEPLOYMENT

Less labor, fewer materials, less maintenance.

► STAND ALONE OR INTEGRATED

Works as a stand-alone product or integrated with existing treatments.

► MINIMAL PERSONNEL TRAINING REQUIRED

ECONOMICS

► LABOR / MATERIALS SAVINGS

Reduced cost for personnel training, higher profits, and fewer call-backs.

► ECO-FRIENDLY MARKET

Appeals to eco-conscious clients.

► RECURRING REVENUE

Builds long-term loyalty and recurring revenues.

► MARKETING LEAVE-BEHIND

A great marketing leave-behind for customers.
